DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-25, drawn to a semiconductor structure, classified in class 257, subclass 779.
 - II. Claims 26-53, drawn to a method of fabricating a semiconductor structure, classified in class 438, subclass 613.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed in Group I could be made by providing a pre-assembled chip having opposing surfaces in a major plane of the chip (wherein the pre-assembled chip contains solder bumps separated by a dissolvable material, wherein each of the solder bumps is present through the thickness of the pre-assembled chip, and wherein the solder bumps are exposed at each of the opposing surfaces) between a first and second substrate, wherein the solder bumps in the pre-assembled chip makes electrical connections to contacts found on the first and second substrates; and dissolving the dissolvable material. Thus it has been shown that the product as claimed in the invention of Group I may be made by another and materially different process as that claimed in the invention of Group II.

Art Unit: 2823

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Conclusion

4. Paper related to this application may be submitted directly to Art Unit 2823 by facsimile transmission. Papers should be faxed to Art Unit 2823 via the Art Unit 2823 Fax Center located in Crystal Plaza 4, room 4C23. The faxing of such papers must conform with the notice published in the Official Gazette, 1096 OG 30 (15 November 1989). The Art Unit 2823 Fax Center number is (703) 308-7722 or -7724. The Art Unit 2823 Fax Center is to be used only for papers related to Art Unit 2823 applications.
